

ULC-10 Micro Infusion Pump

ULC-10 | Fluid Delivery

Compact micro infusion pump for laboratory liquid delivery and supporting analytical system flow tasks.

Key Features

- Compact liquid delivery pump for laboratory use
- Suitable for micro-flow delivery and supporting instrument modules
- Product materials include images, product document, and videos
- Can be quoted as a standalone pump or system accessory

Typical Applications

- Micro-flow liquid delivery
- Laboratory reaction feeding
- Chromatography accessory flow
- Instrument method development

Selection Reference

Instrument Type	Micro infusion pump
Use Mode	Laboratory liquid delivery
Integration	Standalone or auxiliary module
Documentation	English PDF brochure available
Voltage	Confirm voltage and plug standard before quotation
Document Status	English PDF version for international product selection

Final configuration, accessories, voltage, plug standard, documentation scope, and delivery details should be confirmed before quotation.
