

Water Quality Digestion Reactor

YS6006B | Sample Preparation

Digestion instrument for preparing water samples before COD and related water quality measurements.

Key Features

- Sample digestion for water quality analysis
- Supports routine water testing workflows before measurement
- Useful for environmental and wastewater testing laboratories
- RFQ configuration can be confirmed by test item and digestion requirement

Typical Applications

- COD digestion
- Wastewater testing
- Environmental laboratory pretreatment
- Industrial water quality control

Selection Reference

Instrument Type	Water quality digestion reactor
Function	Water sample digestion and pretreatment
Typical Use	COD and related water testing workflows
Configuration	Model and tube count confirmed by RFQ
Voltage	Confirm voltage and plug standard before quotation
Document Status	English PDF version for international product selection

Final configuration, accessories, voltage, plug standard, documentation scope, and delivery details should be confirmed before quotation.
